Semiramis L. Carbajal-Mamani, et al. Robotic-assisted cytoreduction in ovarian cancer

**Supplementary Table 3.** Other oncologic considerations

Case	Recurrence site	Objective confirmation CT scan (No. of weeks from surgery, evidence of disease)	Objective confirmation CA-125 4 weeks after surgery: normal CA-125?	BRCA pathogenic variant	Node dissection	Bowel resection
1	Chest, peritoneum, abdomen and pelvis	8, none	Yes	Negative	Yes	No
2	Chemical recurrence (elevated CA-125); CT scan No disease	12, none	Yes	Negative	No	No
3	No recurrence	20, none	Yes	Negative	Yes	Partial transverse colon resection
4	Pelvic and retroperitoneal lymph nodes	8, none	Yes	Negative	No	No
5	No recurrence	12, none	Yes	Negative	No	No
6	Peritoneum and abdomen	8, none	Yes	Negative	No	Partial cecal resection with primary repair and appendectomy
7	Peritoneum and abdomen	4, ascites	Abnormal (84), but lower than before surgery (240)	Negative	No	Right and transverse colon resection and partial stomach resection
8	Peritoneum, abdomen and 6-cm pelvic tumor	12, none	Yes	Unknown	No	No
9	No recurrence	2, none	Yes	Negative	No	Small bowel resection with side-to-side re-anastomosis.
10	No recurrence	4, none	Yes	BRCA1	No	Appendix
11	No recurrence	4, none	Yes	Negative	Yes	No
12	No recurrence	12, none	Yes	BRCA1	No	No

CT, computed tomography; CA-125, cancer antigen 125.
